

## GRADE 8 CHAPTER MAP - LINEAR EQUATIONS

LECTURE 01:

**ALGEBRAIC EXPRESSIONS** 

- Linear equations in one variable: Variable on one side
- Solving linear equations in one variable: Variables on one side
- Linear equations in one vairable: Variable on two sides
- Solving linear equations in one variable: Variables on two side
- Reducing equations to
- simpler form

 $\bigcirc \bigcirc$ 

 Equations reducible to linear form

## **SUBTRACTION:**

Divya added five-sixths of water to her aquarium.

Her neighbor Natasha added eleven-eighths of water to her aquarium. How much more water did Natasha add than Dina?

## 11/8 - 5/6 = 13/24
